PRESS RELEASE

InfoGin Announces Technology Partnership with Comverse

InfoGin's Intelligent Mobile Platform™ integrated with Comverse Mobile Internet Gateway (MIG) platform to drive uptake of off-portal content and enable operators across the globe to deliver the most innovative mobile Internet services

CTIA Wireless, Las Vegas, 2 April 2008 – InfoGin, a pioneer and the global market leader in the field of Web-to-Mobile Content & Functionality Adaptation solutions today announced a technology partnership with Comverse, the world's leading supplier of software and systems enabling network-based multimedia enhanced communication and billing services. The partnership is based on the two companies' complementary product and service offerings for mobile operators, designed to deliver unlimited Web content to any mobile device.

As part of the new partnership, InfoGin and Comverse have worked closely to recently deploy InfoGin's patented Intelligent Mobile Platform™ (IMP™) and the Comverse Mobile Internet Gateway platform at Kyvistar, the leading Ukrainian operator with more than 23 million subscribers. As a result, the Ukrainian operator has successfully launched advanced mobile data services and is already achieving a positive user response. The two companies have also successfully launched the service with another Tier-1 operator in Western Europe.

"Comverse solutions contribute significantly to the user experience and to ARPU," said Dror Bin, VP and General Manager, Comverse Messaging. "Comverse Mobile Internet Gateway (MIG) with Content Adaptation gives users unbridled access to the open Internet with a user-friendly format and intuitive navigation, adapting content from Internet sources to the mobile device whenever required. This integrated Content Adaptation solution with InfoGin further enhances our MIG, which enables operators worldwide to manage rapidly expanding mobile data traffic growth and easily launch new applications and services."

Eran Wyler, CEO and founder of InfoGin, stated, "We are pleased to partner with Comverse. The combined solution will enable mobile operators to deliver an unmatched mobile Internet experience. At InfoGin we continue to focus on Web-to-mobile content & functionality adaptation solutions that are dedicated to mobile operators' needs. Together with Comverse, we can offer the world's best technologies that will enable operators to open the Internet, drive consumption of unlimited Web content and most importantly, provide mobile users with the best, real Internet experience on any mobile device."

The Whole Web @ Your Call

InfoGin's IMP™ is a server-based middleware platform that supports all mobile browsers, languages and advanced Web page features.

InfoGin's complete range of Web-to-Mobile Content & Functionality Adaptation solutions will be demonstrated at CTIA in Las Vegas at InfoGin's meeting room number 573.

About InfoGin

Established in April 2000 and headquartered near Tel Aviv, Israel, InfoGin is a pioneer and market leader offering a complete Web-to-mobile content and functionality adaptation solution that provides mobile users with the ultimate Internet experience on any mobile device. Based on more than eight years of research, InfoGin's patented technology ranges from a fully automatic and real time intelligent conversion engine to professional content editing and marketing tools. The Intelligent Mobile Platform™ (IMP™) enables complete control over all content delivered to mobile devices.

InfoGin's technology is commercially deployed with more than 32 top tier operators, leading content aggregators and search providers worldwide. InfoGin's customers report a phenomenal increase in data usage, doubling their overall portal traffic in less than three months – without cannibalizing their existing data offerings, and reducing by more than 80% the operational costs of creating content and managing the configuration of mobile devices. InfoGin's technology has provided more than 20 million mobile users across the globe the best *real* Internet surfing experience on a daily basis, spanning more than 5,700 mobile devices. This release contains "forward-looking statements" under the Private Securities Litigation Reform Act of 1995 that involve risks and uncertainties. There can be no assurances that any forward-looking statements will be achieved, and actual results could differ materially from forecasts and estimates. Important factors that could affect the company include: the results of the investigation of the Special Committee, appointed by the Board of Directors on March 14, 2006, of matters relating to the company's stock option grant practices and other accounting matters, including errors in revenue recognition, errors in the recording of deferred tax accounts, expense misclassification, the possible misuse of accounting reserves and the understatement of backlog; the impact of any restatement of financial statements of the company or other actions that may be taken or required as a result of such investigation or as result of the company's VSOE evaluation; the company's inability to file reports with the Securities and Exchange Commission; the effects of the delisting of the company's Common Stock from NASDAQ and the quotation of the company's Common Stock in the "Pink Sheets," including any adverse effects relating to the trading of the stock due to, among other things, the absence of market makers; risks relating to the company's ability to relist its Common Stock on NASDAQ; risks relating to alleged defaults under the company's ZYPS indentures, including acceleration of repayment; risks of litigation (including the pending securities class action and derivative lawsuits and any potential civil injunctive action by the Securities and Exchange Commission) and of governmental investigations or proceedings arising out of or related to the company's stock option practices or any other accounting irregularities or any restatement of the financial statements of the company, including the direct and indirect costs of such investigations and restatement; risks related to Verint Systems Inc.'s merger with Witness Systems, Inc., including risks associated with integrating the businesses and employees of Witness; risks associated with integrating the businesses and employees of the Global Software Services division acquired from CSG Systems International, Netcentrex S.A. and Netonomy, Inc.; changes in the demand for the company's products; changes in capital spending among the company's current and prospective customers; the risks associated with the sale of large, complex, high capacity systems and with new product introductions as well as the uncertainty of customer acceptance of these new or enhanced products from either the company or its competition; risks associated with rapidly changing technology and the ability of the company to introduce new products on a timely and cost-effective basis; aggressive competition may force the company to reduce prices; a failure to compensate any decrease in the sale of the company's traditional products with a corresponding increase in sales of new products; risks associated with changes in the competitive or regulatory environment in which the company operates; risks associated with prosecuting or defending allegations or claims of infringement of intellectual property rights; risks associated with significant foreign operations and international sales and investment activities, including fluctuations in foreign currency exchange rates, interest rates, and valuations of public and private equity; the volatility of macroeconomic and industry conditions and the international marketplace; the risk of declines in information technology spending; risks associated with the company's ability to retain existing personnel and recruit and retain qualified personnel; and other risks described in filings with the Securities and Exchange Commission. The company undertakes no commitment to update or revise forward-looking statements except as required by law.
