

## **InfoGin Ranked 6 Among Deloitte's Technology Fast 50 Winning Companies in Israel**

### ***InfoGin Recognized in the Top Ten of Israel's 50 Fastest Growing Companies***

**Kfar-Saba, Israel, November 2, 2009** - InfoGin ([www.infogin.com](http://www.infogin.com)), the pioneer and market leader in content & functionality adaptation solutions today announced that the company has ranked 6<sup>th</sup> among the Deloitte Technology Fast 50, a ranking of the 50 fastest growing technology companies in Israel. At the Deloitte awards ceremony held in Tel Aviv November 1<sup>st</sup>, it was revealed that InfoGin ranked number 6 on the 2009 list, with an impressive revenue growth of 1723% over a five-year period.

"Achieving sustained revenue growth of 1,723% over five years is a tremendous accomplishment for a technology company operating in a competitive world", said Tal Chen, director in charge of the Deloitte Brightman Almagor Zohar Israel Technology Fast 50 Program. InfoGin deserves a lot of credit for its remarkable growth, and we commend them for it."

Eran Wyler, CEO & Founder of InfoGin, commented: "This is the third consecutive year in which InfoGin is being awarded in the Deloitte Fast 50 program, honoring the 50 fastest growing companies in Israel, and this year we are very pleased to be ranked number 6 amongst the top ten. InfoGin's commercial customers span the entire globe and include top tier mobile operators, content providers and Internet mega players. InfoGin recently opened a US subsidiary and intends to expand its business activities in North America, continuing our steady growth and increasing our market share year after year."

InfoGin continues to lead with its complete range of online mobile solutions, heavily investing in technology innovation, research and development. InfoGin combines the technology of the Internet world with the mobile space and provides a solid environment for operators and content providers to sustain customer loyalty, reduce network operating costs and generate new revenue streams, while maintaining the ultimate browsing experience for mobile users on every mobile device.

In the near future, InfoGin plans to introduce revolutionary technology to be launched with smartphone devices such as the iPhone.
